

Slopes Puzzle

Cut apart the pieces. Using the slopes of these linear equations, line up the equations that are parallel or perpendicular to each other. The puzzle forms a new square when completed.

$15x = -8y + 2$ $5x + 6y = 15$	$4x - y = 8$ $10 = 4y - 3x$	$7x - 8y = 16$ $9 = 3y + x$	$2x = 3y + 8$ $21 = 5y$
